

## Basics Task 1

### Tasks to Complete:

1. Write a Dart function that takes two numbers as parameters and returns their sum.
2. Write a function that takes an integer as input and returns "Even" if the number is even and "Odd" otherwise.
3. Create a function that takes three numbers as arguments and returns the largest number.
4. Write a function that takes a string as input and returns the reversed string.
5. Create a recursive function to calculate the factorial of a given number.
6. Write a function that checks if a given number is prime.
7. Write a recursive function to print the Fibonacci series up to n terms.
8. Write a function that counts and returns the number of vowels in a given string.
9. Write a function to calculate the **GCD** of two numbers using recursion.
10. Create a function that converts a temperature from Celsius to Fahrenheit.
